**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: On page 26, lines 8 and 14-16, there are boxes where it appears that there should be greek letters.

Appropriate correction is required.

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2, 4, 5, 7, and 9-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Hiraoka et al (6,465,742).

The applied reference has a common inventor and assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Art Unit: 1752

Hiraoka et al disclose a three dimensional structure comprising a porous body and a plurality of regions having a substance loaded in the porous body. The reference teaches coating a photosensitive material which appears to meet the instant claim limitations onto the PTFE porous body then forming a pattern in the material. Then, this is followed by introducing metal ions into the pattern using an electroless plating method.

***Allowable Subject Matter***

5. Claims 3, 6, 8, and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record fails to teach or suggest to one of ordinary skill in the art to prepare the material of the instant independent claims wherein the radical generating agent is a peroxide ester or wherein the specific groups claimed by claims 14-16 are present.

6. The following is a statement of reasons for the indication of allowable subject matter: Claims 17-19 are indicated as containing allowable subject matter as the prior art of record fails to teach or suggest to one of ordinary skill in the art to prepare a photosensitive composition as claimed by the instant claim 17 wherein the compound contains a photosensitizer.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Furusawa (6,660,545), Meola (5,498,467), Garrison et al (5,697,390), Ito et al (5,473,120), Couture et al (5,415,971), Asakawa et al (6,649,516), and Hotta et al (6,709,806) are cited for their teachings of similar materials and methods.
